

## Challenge Type: Enhance

Using the provided starter code, complete a React Page that will show the trending GIFS on [giphy.com](https://giphy.com)

1. Sign up as a developer on <https://developers.giphy.com/>
2. Create a new app to get your API key.
  - a. Look at the Giphy documentation to find out how to get the trending gifs: <https://developers.giphy.com/docs/>
  - b. You can use the following url: [http://api.giphy.com/v1/gifs/trending?api\\_key=<YOURAPI KEY>](http://api.giphy.com/v1/gifs/trending?api_key=<YOURAPI KEY>) in the browser to see what you get back
  - c. If you get a "CORS error", use a workaround using <https://cors-anywhere.herokuapp.com/<URL>>
3. When the app loads, it should display trending gifs
4. If the user wants to see different gifs, they can search using the form. Complete the searchGifs function to display gifs from a user's search. Make sure to set the apps loading state to true when searching for new gifs.
